

$\text{row} = 1 \quad \text{star} = 5$

Ques 7:

$n = 5$

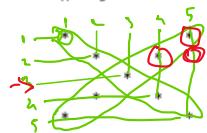

$\text{while}(\text{row} \leq n)\{$

```

    - int i=1
      while(i<=star){
        if(row == 1 || row == n)
          i = 1 || i = n
        cout(*)
      }
      //next line
      row++
    }
```

Ques 8:
 $n = 5$

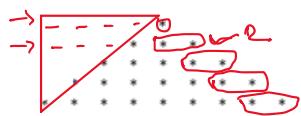

$n = 5 \quad \text{row} = 1$

$$\begin{aligned}
 1+5 &= 6-1 = 5 = n \\
 2+4 &= 6-1 = 5 = n \\
 3+3 &= 6-1 = 5 = n \\
 2+5 &= 7-1 = 6 = n
 \end{aligned}$$

```

  if(row == i || row + i - 1 == n){
    cout(*)
  } else {
    cout(" ")
  }
}
```

Ques 9:
 $n = 5$

$\text{while}(\text{row} \leq n)\{$

```

    //space
    [
    //star
    ]
```

$\text{row}++$
 $\text{space}--$
 $\text{star}+=2$

Ques 10:

$n = 5$

$n+2-1 = 9 \quad \text{star} = n*2-1 \quad \text{space} = 2 \times 2 \quad \text{star} = 8 \neq 5$

$\text{row} = 1 \neq 3$

$\text{while}(\text{row} \leq n)\{$

$//space$

```

while(gow<=n){
    //space
    int i = 1;
    while(i<=space){
        cout(" ")
        i++;
    }
    int starz = 1;
    int j = 1;
    while(j<=starz){
        cout("*")
        j++;
    }
    space++; starz-=2;
    cout();
}

```
